Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

YETI II starts with one horrific event that collides with a mind-numbing scenario, creating a paramount story of ultimate terror. Deep within the Alaskan wilderness, Lara Marshall awaits her husband and boy's return from hunting. When one of their horses shows up at the cabin, Lara panics. She rides out and finds Roy and her son Phillip severely mauled by a bear. Her other boy, Eric - is missing. Unexpectedly, Travis Reed - ex Army Ranger who has come to Alaska to live in the wilderness, ventures upon her cabin. What he finds is a gruesome sight. Lara is out of her mind. After settling her down, she tells him everything; especially the condition of the bear. The animal had been torn to pieces. While Travis and Lara are out searching for Eric, Whitetail gets word of the terrifying event. Her gut instinct knows what happened. She must find Eric - quick. After crossing the western mountain range where the bear attack occurred, Whitetail and Jim come upon a young woman named Judy, running from evil men. The men captured her boyfriend Mike. They were after the gold the two discovered while working at a mining camp. Judy warns Whitetail that the mining camp is full of vultures - anyone who goes there seems to disappear. Prepare yourself for a terrifying journey as the search for Eric turns into a poisonous web of evil

YOU CAN DO IT! Challenges is the new course for teenagers which gives them everything they need to be successful in learning English. Written by the authors of the global bestseller: Opportunities

Announcing the completely revised and updated edition of *The Wine Bible*, the perennial bestselling wine book praised as "The most informative and entertaining book I've ever seen on the subject" (Danny Meyer), "A guide that has all the answers" (Bobby Flay), "Astounding" (Thomas Keller), and "A magnificent masterpiece of wine writing" (Kevin Zraly). Like a lively course from an expert teacher, *The Wine Bible* grounds the reader deeply in the fundamentals while layering on informative asides, tips, amusing anecdotes, definitions, glossaries, photos (all new for this edition), maps, labels, and recommended bottles. Karen MacNeil's information comes directly through primary research; for this second edition she has tasted more than 10,000 wines and visited dozens of wine regions around the world. New to the book are wines of China, Japan, Mexico, and Slovenia. And through it all the reader becomes ever more informed—and, because of the author's unique voice, always entertained: "In great years Pétrus is ravishing, elegant, and rich—Ingrid Bergman in red satin." Or, describing a Riesling: "A laser beam. A sheet of ice. A great crackling bolt of lightning."

This clinically focused book explores W. R. Bion's thinking on primitive and unrepresented mental states and shows how therapists can work effectively with traumatized patients who are difficult to reach. The author illuminates how trauma survivors suffer from direct access to primal undifferentiated positions of the psyche that lie outside the symbolic order of the mind and are resistant to treatment. This access, unmediated by symbolic representation but represented in the body, disrupts the normal trajectory of development and of relationship. Integrating theory and clinical application, the book addresses processes of symbolization, somatic receptivity, and the use of countertransference when working therapeutically with undeveloped areas of the mind. It also demonstrates how primitive body relations and object relations include the body of the analyst as part of the analytic frame and are essential in establishing a therapeutic alliance. Illustrated with detailed clinical vignettes, *Bion and Primitive Mental States* is important reading for psychoanalysts, psychologists, social workers, and educators who wish to understand primitive states of mind and body in patients who have previously been considered untreatable.
