In addition to the revenues raised, the database gives information on the tax-base covered, the tax rates applied, important exemptions and refund mechanisms.

Environmental taxation - OECD

Environmental tax. Environmentally related taxes are an important instrument for governments to shape relative prices of goods and services. The characteristics of such taxes included in the database (e.g. revenue, tax base, tax rates, exemptions, etc.) are used to construct the environmentally related tax revenues with a breakdown by environmental domain: energy products (including vehicle fuels); motor vehicles and transport services; measured or estimated emissions to air and water, ozone ...

Environmental policy - Environmental tax - OECD Data

By putting a price on pollution, taxes and tradable permit systems incentivise emissions abatement at the lowest possible cost. The OECD's work on tax and the environment investigates to what extent countries harness the power of taxes and tradable permit systems for environmental and climate policy. Additional topics of expertise include the interaction between environmental taxation and the broader tax system, and the impacts of environmental taxes on competitiveness and on equity.

Tax and the Environment - OECD

Taxation and Environmental Policies. The OECD has worked on issues related to environmental taxes for many years. From 1999 to 2000, it reviewed environmentally related taxes in OECD countries and prepared a report on Environmentally Related Taxes in OECD Countries: Issues and Strategies. The main lessons that can be drawn from this report are outlined below.

Taxation and Environmental Policies - OECD

Environmentally related taxes are an important instrument for governments to shape relative prices of goods and services. The characteristics of such taxes included in the database (e.g. revenue, tax base, tax rates, exemptions, etc.) are used to construct the environmentally related tax revenues with a breakdown by environmental domain: energy products (including vehicle fuels); motor vehicles and transport services; measured or estimated emissions to air and water, ozone depleting ...

OECD iLibrary | Environmental tax

OECD governments are increasingly using environmentally related taxes because they are typically one of the most effective policy tools available. Exploring the relationship between environmentally related taxation and innovation is critical to understanding the full impacts of this policy instrument - one potential facet of "green growth."

Taxation, Innovation and the Environment - OECD

This paper argues that cost-benefit analysis (CBA) could enrich ex-post assessments of environmentally related tax policies, given that CBA provides decision makers with a broader perspective of social costs and benefits and allows the identification of potential trade-offs among policy objectives. This paper provides a concrete example of how policy analysts can use empirical programme evaluation studies to perform ex-post assessments of environmentally related tax policies.

Environment - OECD Data

Environmentally-related taxes are taxes on energy use, motor vehicle taxes and other taxes on transport, and taxes on waste and plastic. Environmentally-related taxes, on average, account for only 6.7 percent of total tax revenue among OECD countries.

Countries Eye Environmental Taxation | Tax Foundation

Luxembourg has made progress in decoupling environmental pressures from economic growth, treating wastewater and managing waste and materials. It has also positioned itself as an international centre for green finance. Yet, it remains one of the most carbon- and material-intensive economies in the OECD. The country is a crossroads for freight traffic and attracts thousands of daily cross ...
