First published in 1891,  
Pellegrino Artusi's *La

come to be recognized  
as the most significant  
Italian cookbook of  
modern times. It was  
reprinted thirteen times  
and had sold more than

52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen

utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor – humorous and nonchalant. He indulges in witty anecdotes about many of the recipes,

Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that

The Renaissance  
philosopher Giordano  
Bruno was a notable  
supporter of the new

science that arose during his lifetime; his role in its development has been debated ever since the early seventeenth century. Hilary Gatti here reevaluates Bruno's contribution to the scientific revolution, in the process challenging the view that now dominates Bruno criticism among English-language scholars. This

argument, associated with the work of Frances Yates, holds that early modern science was impregnated with and shaped by Hermetic and occult traditions, and has led scholars to view Bruno primarily as a magus. Gatti reinstates Bruno as a scientific thinker and occasional investigator of

importance of Bruno's  
links to the magnetic

When Aldous Huxley  
wrote his famous novel  
Brave New World, he  
did so with the sincere

belief that the dystopian world he created was a true possibility given the direction of the social, political and economic world order. Written almost thirty years later, *Brave New World Revisited* is a re-evaluation of his predictions based on the changes he had witnessed in the meantime. In this twelve-

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example,

providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to

Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source

This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book.
