derived from the Latin *textilis* and the French *texere* , meaning “to weave,” and it originally referred only to woven fabrics.

~~List of textiles | Britannica~~

The manufacture of textiles is one of the oldest of human technologies. To make textiles, the first requirement is a source of fibre from which a yarn can be made, primarily by spinning. (Both fibre and fiber are used in this article.) The yarn is processed by knitting or weaving, which turns yarn into cloth.

Denim is one of fashion's dirtiest textiles: in Xintang, denim hotspot of the world, the water runs indigo and locals suffer respiratory and reproductive issues. Dyeing and distressing denim fabric requires huge quantities of water and is associated with dangerously high levels of heavy metals, according to a 2010 study by Greenpeace.

Discovery of Early Textiles The oldest example of textiles yet identified by archaeologists is at the Dzudzuana Cave in the former Soviet state of Georgia. There, a handful of flax fibers was discovered that had been twisted, cut and even dyed a range of colors. The fibers were radiocarbon-dated to between 30,000-36,000 years ago.

This book approaches textiles through a sequence of practical projects - on elements of design, fabric, construction, consumer protection - without informational text. The projects progress in difficulty, so that the students accumulate skills and experience through activity-based learning.

2011 Updated Reprint. Updated Annually. Czech Republic Starting Business (Incorporating) in....Guide

Textile industry is one of the few basic industries, which is characterised as a necessary component of human life. One may classify it as a more glamorous industry, but whatever it is, it provides with the basic requirement called clothes. Spinning is the process of converting cotton or manmade fibre

Read Online Starting Textiles

into yarn to be used for weaving and knitting. Weaving is a method of textile production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric or cloth.

Finishing refers to the processes that convert the woven or knitted cloth into a usable material. Printing is the process of applying colour to fabric in definite patterns or designs. The textile industry occupies an important position in the total volume of merchandise trade across countries.

Developing countries account for little over two-third of world exports in textiles and clothing. It is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly. The future for the textile industry looks promising, buoyed by both strong domestic

reforms. From the 1920s and 1930s strong ties were built between Chinese textile industrialists and foreign machinery importers in Shanghai and the Yangzi Delta. Despite the fragmentation of China, the contribution of these networks to the modernization of the country was important and longstanding. Facing the challenge of growing in a fragmented country, Chinese textile firms such as Dafeng, Dacheng and Lixin focused on urban markets and also on importing technology for upgrading their production. When the war against Japan blocked trade routes inside China, these networks were concentrated in Shanghai where they envisaged an export-oriented development strategy for China that was based on importing machinery and exporting manufactured products.

Read Online Starting Textiles

However, this strategy was only implemented precariously in Shanghai, while the city stood as a neutral space in the first years of the Japanese occupation, but was only consolidated in Hong Kong in the late 1940s, where textile industrialist and most of the foreign importers migrated. These networks were thus reestablished in Hong Kong, where they contributed to the city's industrialization in the Cold War period. Meanwhile, the Chinese industrialists that stayed in Shanghai and the Yangzi Delta had to adapt to the Maoist regime and were progressively incorporated into the state-owned companies or the local government agencies such as the United Front or the Textile bureaus. However, from the early 1970s, the links between Hong Kong and Shanghai were reactivated and these

networks played, again, a key role in the modernization of China, especially regarding the imports of technology and exports of manufactured goods. The book ends with the first joint-ventures between Hong Kong businessmen and Chinese local administrations that took place in the beginnings of China's economic reforms in 1979.

The sensing, adapting, responding, multifunctionality, low energy, small size and weight, ease of forming, and low-cost attributes of smart textiles and their multidisciplinary scope offer numerous end uses in medical, sports and fitness, military, fashion, automotive, aerospace, the built environment, and energy industries.
